

I have been informed the NAB wants to take away the ability to for me to hear my Traffic and Whether through XM Radio. I feel this would be a wrong move on the part of Congress. I believe that if I am willing to pay for this service the NAB has no right to take it away. When or if local and national broadcasters want to be on the cutting edge of technology, then they should give what the public wants, not to try and stop what people want or are willing to pay for. Please do not support the NAB's petition 04-160.

Respectfully

Tim Carlton
